

**VILLAGE OF MILL NECK**  
**IMPROVEMENTS OF**  
**THE ROBERT DEGRAFF CAUSEWAY**

On Tuesday, **October 13, 2020**, work will begin on installing new curbing and paving on the causeway between Factory Pond Road and Frost Mill Road. The road will be closed during the day to all traffic. Detour signs at the intersections of Feeks Lane and Factory Pond Road and Cleft Road and Frost Mill Road will direct traffic away from the project.

The work may last three weeks depending on weather and other factors. The road is expected to be open when work is not being done and on weekends. We are sorry for any inconvenience to those who regularly travel this road but look forward to an improved causeway road. Erosion control measures will be installed before the project begins. Please visit our website for updates and progress reports on this work.
